# Embark on a Journey to the WORLD's 2ND LARGEST POTATO, F&V AND FOOD RETAIL MARKET.....INDIA

## INDIA: A POWERHOUSE IN THE GLOBAL POTATO ECONOMY

India, the world's second-largest potato producer, represents one of the most dynamic and promising markets for the global potato industry. Backed by diverse agro-climatic conditions, a resilient agricultural base, and a rapidly expanding food processing sector, India is uniquely positioned to drive sustained growth across potato production, value addition, and exports.

Rising urbanization, a growing middle class, and evolving food habits have accelerated demand for both fresh and processed potato products, particularly in the snacks and convenience food segments. However, challenges such as post-harvest losses, supply chain inefficiencies, technology gaps, and sustainability concerns highlight the need for a unified global platform connecting stakeholders across the potato value chain.

### Global Potato Summit: A Dedicated Farm To Fork Platform

Building on the success of its inaugural edition, Media Today Group presents the 2nd Edition of the Global Potato Summit (GPS 2026)—a focused international platform uniting the global potato ecosystem.

GPS 2026 brings together growers, processors, chips and snack manufacturers, exporters, technology providers, policymakers, researchers, investors, and global buyers to exchange knowledge, explore partnerships, and unlock business opportunities.

### Potato Agriculture & Primary Production

At its core, the Global Potato Summit is a comprehensive agri-industry platform that begins at the farm and extends to processing, trade, and consumption. Sustainable growth of the global potato industry is impossible without strong foundations in seed quality, farm productivity, climate resilience, and efficient post-harvest management.

The Summit serves as a focused knowledge and business platform connecting seed companies, agri-input and machinery providers, researchers, extension agencies, farmers, processors, exporters, policymakers, and technology providers.

### Potato Chips & Snack Processing Industry

The potato chips industry is the fastest-growing and most commercially impactful segment in India and the Asia Pacific, forming the backbone of organised potato processing and contributing significantly to FMCG growth. Chips are a high value-adding product with consistent demand across all markets, driven by seed quality, farming practices, storage, and processing, along with innovations in flavors, formats, healthier variants, and packaging. They account for nearly 30% of India's organised snack market, supported by QSRs, modern retail, e-commerce, and quick commerce. Asia Pacific, led by India, China, and South Asia, is expected to drive 57% of global potato market growth, fueled by potatoes' role as a staple and convenience food ingredient.

### Indian Frozen & Processed Potato Outlook

The Indian frozen and processed potato products market was valued at USD 1.77 billion in 2023 and is projected to grow at a CAGR of 17%, reaching USD 7.23 billion by 2032, driven by the rapid expansion of QSR chains, rising demand for fries, chips, wedges, flakes, and snacks, increased use of dehydrated potato products, and the growing preference for longer shelf life, consistent quality, and convenient food options.

## GUJARAT INDIA'S POTATO HUB

Gujarat stands out as one of India's most progressive states for Potato value added products manufacturing and food processing, making it the ideal location for 2nd edition of the Global Potato Summit 2026.

- Major potato chips and snack manufacturing hub
- Availability of processing-grade, high dry matter, low sugar potato varieties
- Strong MSME and startup ecosystem
- One of India's strongest cold storage and logistics network
- Strategic export gateway with excellent port connectivity
- Investor-friendly policies, food parks, and ease of doing business

## EXPLORE BEYOND THE SUMMIT
